Art Unit: 1711

1. Applicant's election without traverse of Group I, claims 1-11, 46, 55, and 56 in Paper No. 7, filed March 18, 2003 is acknowledged.

2. Claim 46 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 46 refers to the prepolymer of claim 44; however, claim 44 is drawn to a method.

3. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The value 1.1.03 within line 2 of each claim is improper.

4. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within claim 1, it is unclear that the multifunctional compound is mutually exclusive from reactants (b) or (c), because there is no requirement that the functionality exceed two. Furthermore, it is unclear that the multifunctional compound is to be reactive with (b) or (c).

Within claims 2 and 3, it is not clear that component (c) is a reactant, since no functional groups have been specified. Furthermore, within claim 3, it is unclear if component (c) is mutually exclusive from component (a).

Art Unit: 1711

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Knopf et al. ('542) or Hoy et al. ('605).

Patentees disclose the production of low viscosity prepolymers from diols, triols, and diisocyanates. See column 3, lines 8+ and column 7 within Knopf et al. See column 4, lines 40+ within Hoy et al.

7. Claims 8-11, 55, and 56 are allowable.

Any inquiry concerning this communication should be directed to R. Sergent at telephone number (703) 308-2982.
